[Portfolio](#)

**Hebrew** (Native), **English** (Fluent), **Russian** (Native), **Spanish** (Intermediate)

I'm a passionate frontend developer with a deep love for coding and a good grasp on UX/UI design. I have extensive experience working at a global company with clients and colleagues all around the world. I'm a self-learner and problem solver, strongly motivated to achieve success in every task at hand.

## EDUCATION

**Full Stack Development Bootcamp, Sela College** 2021 – 2022

A year long program that covered essential concepts such as Object-Oriented Programming, Data Structures, Algorithms, Complexity, and Design Patterns, various programming languages, frameworks, and databases.

**React - The Complete Guide (including Hooks, React Router, Redux), Udemy** 2023

**React, NodeJS, Express & MongoDB - The MERN FullStack Guide, Udemy** 2023

**Design Rules: Principles + Practices for Great UI Design, Udemy** 2023

## PROJECTS

**Board Games Website, [Live demo](#) and [GitHub](#)**

I designed and developed a website that allows people to meet up and play board games, a hobby of mine. I've put great emphasis on UX/UI, making the website aesthetically pleasing, intuitive and fully responsive, including dark and light modes, page animations, loading skeletons, maps, alerts and much more.

People can browse board games and see upcoming events. Registered users can join, create, and delete events, find the events they created or attending in one place, create, read, edit, and delete comments and more. I used **JavaScript**, **React**, **MUI**, **Jest**, **GitHub**, **Firestore DB**, **Firebase** for Auth, Storage, and Hosting.

**Chat and Play, [GitHub](#)**

People can login/register, play tic-tac-toe and chat with a friend in a private chatroom online in real-time. I Used **JavaScript**, **React**, **CSS**, **Node**, **Express** and **Socket.IO**, deployed to **Azure Cloud**.

**Bookstore Catalogue Website, [GitHub](#)**

People can see popular books, filter by genre, add book reviews, and perform CRUD operations as Admin. Backend: **C#** using the MVC pattern in **.Net ASP Core**, **JavaScript**, **CSS**, **Bootstrap**. Database: **MSSql**.

For more projects, demos, and information – visit my [Portfolio](#) or [GitHub](#).

## TECH STACK

**Frontend:** Java Script • React • CSS • HTML • Material UI • Bootstrap • Redux • TypeScript • Jest

**Backend, DBs, and Tools:** Node • Express • C# • Firebase • Git • MongoDB • MSSql • Postman

## PROFESSIONAL EXPERIENCE

**Project Manager, Baguette Translations** 2016 – Present

Working in an international company with clients in Europe and the USA. Processing client requests and preparing detailed work plans. Managing the full lifecycle of a project, including budget and resources. Working under tight schedules, tackling problems, and quickly finding suitable solutions.

## VOLUNTEERING

I volunteered as a linguistic editor for 3 years at 'Little Big Science', a non-profit organization that promotes science accessibility to the public – a cause I find extremely important.
